Introduction and background

The Department recognises that the Coronavirus pandemic and the Government restrictions imposed as a result of the ongoing crisis are continuing to have a significant negative effect on many local businesses. It is hoped that the support provided under this Scheme will help those businesses to retain jobs and continue trading both during and after the global crisis.

The Scheme aims to provide grant assistance via two options to eligible businesses which have suffered a reduction in turnover due to the restrictions resulting from the ongoing pandemic:

- Support towards business adaptation - this option for support is open to a wide range of sectors other than those excluded, details of which can be found on page 10; and
- Assistance towards essential business overheads - this option is only open to businesses in the tourism and travel related sectors.

Only businesses in the tourism and travel related sectors may apply for both options.

The assistance under this package of support is available until 30th June 2021.

The Department for Enterprise's Coronavirus Recovery Scheme is made under the Coronavirus Business Support Scheme 2020 ("the Scheme"). The Coronavirus Recovery Scheme came into force on 26th December 2020 to replace Appendices 9 and 10 of the Financial Assistance Scheme.

1. The Coronavirus Business Support Scheme

1.1 Purpose and scope

The purpose of the Scheme is to provide financial assistance in the form of a grant payment to those applicants that meet the Scheme's eligibility criteria (please refer to 1.3) to support the costs of adapting a business and/or to provide support towards essential ongoing operational costs.

1.2 Overview of available support

The Scheme offers two options for financial support by way of a grant to eligible applicants towards business adaptation and, if eligible, essential business overheads. Eligible businesses can apply for either or both options as set out below.

1.2.1. Financial Assistance towards Business Adaptation

Some businesses may wish to consider innovating and adapting their existing business model in order to maintain and hopefully grow revenues.

The Department considers an adaptation to be a change to the way a business provides the products or services within its current business model, for example:

- 1) Retail stores - adapting to offer online ordering/click and collect services;
- 2) Wholesalers - adapting product lines and offering alternative sales channels;
- 3) Restaurants and Cafés - adapting to offer online ordering systems for collection and deliveries;
- 4) All sectors - improving ventilation systems to improve the air quality in the premises;

Or targeting a new customer base for example, a souvenir shop that would normally rely on tourist trade targeting on-island customers with care packages to send to family and friends off-island.

The Department will therefore only consider offering grant assistance towards the essential costs required to carry out genuine adaptation of the existing business model.

The adaptation must also be considered necessary directly as a result of the current coronavirus related restrictions in place, in order for the business to keep operating. This can include undertaking improvement works to ventilation systems to improve air quality.

No grant assistance will be offered in cases where a business is considered to be simply expanding or offering an extension of the services already provided e.g. a restaurant building an extension of its physical premises or a shop offering the same products for hire as well as for sale.

Only eligible adaptation costs incurred from 27th February 2021 will be eligible for grant assistance.

Funding may be reduced or capped on some specific types of expenditure as noted under 'eligible expenditure' below.

In most cases, it is expected that the changes being made to the business and for which support is being sought, bring about new and long lasting changes to the business model.

Eligible Expenditure

The Department will refund up to 50% of the approved expenditure in the areas identified below:

- Modification to facilities. This may be subject to a reduced level of support if part of the modification is ineligible for assistance;
- Capital equipment (purchased or leased);
- Equipment needed to deliver new products or services;
- Up to £7,500 towards one business vehicle bought or leased to deliver new products or services where the business does not already own a vehicle and it will provide a permanent change to the business model. No support is available for the replacement or upgrade of vehicles or expanding a fleet of vehicles;
- Rent on any additional space leased;
- Protective screens, capped at a maximum of £500 per business (only in cases where they are an essential part of the adaptation and none were already installed e.g. a restaurant that did not previously offer a takeaway service installing a public facing takeaway hatch/counter);
- Ventilation works to improve indoor air quality by circulating air from an outside source or re-circulating air via a filtration system, capped at a maximum of £5,000 per business. Any application for ventilation work must be accompanied by an independent health and safety report with a recommendation on the ventilation system (this report cannot be issued by any company selling, installing or affiliated with the ventilation system). The Department will assist with a grant of a maximum of £500 towards this report;
- IT hardware/software, capped at a maximum of £10k for businesses with less than 10 full time employees and a maximum of £25k for businesses with over 10 FTEs, across a combination of both software and hardware (only available in cases where it is essential for the adaptation being carried out e.g. a personal trainer purchasing a laptop and software in order to provide online training sessions. No assistance will be provided towards IT hardware or software for homeworking, where the only change to the business model is to work from home);
- 1st year costs of establishing the new area of business for example, legal, accounting and meeting health & safety or environmental standards; and
- Other reasonable costs as agreed by the Department on a case by case basis.

Note:

- Any equipment or vehicles that are second hand will need to have been purchased from an independent third party, and may also require separate independent valuation. Only work carried out by an independent third party will be eligible for grant assistance. No grant assistance will be offered towards stock or consumable items which are considered an ongoing business cost, including consumable PPE items.
- Support towards adaptation costs for businesses in the Tourist Accommodation sector is limited to online booking systems, 'track and trace' systems and ventilation systems only.

Only one application per business will usually be allowed.

1.2.2. Financial Assistance towards Business Overheads for businesses operating in the tourism and travel related sectors

Financial assistance is offered by way of a grant towards the demonstrated short term (i.e. 6 months) forecasted cash flow requirements for eligible costs which includes salaries and overheads on a case by case basis. There are two flat rates of support available, being 25% or 50% (see table below).

Up to 25% of residual salaries and overheads	As above, but where reduction in turnover is greater than 25%, but less than 50%	No payments to related entities No capital or interest repayments

Business Overheads

Applications for assistance towards business overheads may only be considered from eligible applicants operating in the following sectors: -

Travel and tour operators

“Travel and tour operators” means:

- a travel agent;
- a tour operator;
- a coach operator;
- a private car hire operator;
- a car rental business;
- an airport/seaport based taxi operator; or
- an airport parking/valeting business.

With income derived wholly or mainly from such an operation and which has and continues to suffer at least a 25-50% reduction in turnover as a direct result of the border restrictions.

Taxi and private car hire operators must generate more than 50% of their revenue from servicing the Sea Terminal and Airport in order to be eligible.

Animal Care

“Animal Care” means a business carried on in the Island with income wholly or mainly from the keeping of animals in a boarding establishment which is licensed under the Animal Boarding Establishments (Isle of Man) Act 1973 and which has and continues to suffer at least a 25-50% reduction in turnover as a direct result of the border restrictions.

This excludes operators who provide purely animal day care facilities.

Campsites

Applications may be considered from permanent and temporary campsites that do not offer any glamping facilities on a case by case basis.

General

An application may be considered from a business in a sector not noted above but the business must demonstrate that it is directly linked to the tourism and travel sector, such that it derives the majority of its revenue (more than 50%) from customers travelling to and from the Island, and can prove to the satisfaction of the Department that it has, and will continue to suffer, the required reduction of turnover as a result of border restrictions imposed due to Covid-19. Where a business undertakes multiple activities or routes to market, ring fencing may occur to offer support to only those areas deemed eligible. Applications are reviewed on a case by case basis and support will **not** be offered where a business has suffered the required reduction in turnover but only part of this can be evidenced as being attributed to the closure of the borders.

Providers of Tourist Accommodation (other than permanent and temporary campsites without Glamping facilities) are eligible for the **Strategic Capacity Scheme** and are therefore ineligible for assistance under the operating costs element of this scheme. Self-employed persons are also ineligible for assistance under this scheme. Only one company in a group of companies may apply and the assistance must be predominantly used on the Island.

In the case of grant applications towards operating costs, the proposed expenditure must be for use in relation to maintaining the effective operation of the business and its operational cash flow to enable as far as possible, retention of staff and continuity of customer service.
