

ISLE OF MAN CLEANTECH TAXONOMY 2025

ENERGY

ENVIRONMENT

INFRASTRUCTURE

CARBON MANAGEMENT

PRODUCING AND ADAPTING GOODS

Companies creating new solutions or adapting products to make them more sustainable.

ENERGY PRODUCTION, MANAGEMENT AND STORAGE

Companies developing or operating projects producing, managing or storing energy as part of a large scale Island grid solution.

FUELS AND BIOFUELS

Companies developing new technologies and/or products aimed to make the fuel industry more sustainable

AGRICULTURE, FORESTRY AND BIODIVERSITY

Companies providing solutions and technologies that reduce environmental impact, enhance sustainability, promote ecosystem health and enable comprehensive environmental monitoring.

CIRCULAR ECONOMY

Companies creating solutions that promote the reuse, recycling, and sustainable management of resources to minimise waste and environmental impact

BUILT ENVIRONMENT & TRANSPORT

Companies developing technologies and providing solutions for energy-efficient buildings, sustainable living and eco-friendly transportation systems, including instillation of renewables.

CARBON MARKETS, DATA & SUSTAINABLE FINANCE

Companies providing solutions and services to support the understanding, measurement, offset and financing of carbon emission reductions.
